

# We are a Team of Teams

**Our people, your team.** We're no "rent-a-dev". We're your partner: your in-house dedicated team, within our ecosystem of technological support and expertise.

**Our teams move as units.** There's no "storming, forming, norming" delay; we go straight to "performing". Your team stays consistent through our relationship.

**Many of our clients start with one team,** and scale up to two or three teams to capture time-sensitive opportunities.

Spend time and resources on **getting things done**, not on hiring, onboarding, and turnover.

**How soon is too soon** to get the results you need?
